CLAIMS:

What is claimed is:

1	1.	A method comprising:
2		providing a mold having a cavity, wherein a first portion of the cavity forms
3	at lea	st one finger tab, a second portion of the cavity forms a tube, and a third
4	portio	on of the cavity forms a hinge between the first portion of the cavity and the
5	second portion of the cavity;	
6		feeding a molten polymer into the cavity of the mold; and
		cooling the polymer.
	2.	The method of claim 1, further comprising:
		providing a fourth portion of the cavity which forms a self-sealing valve.
1 1 2 3	3.	The method of claim 1, wherein feeding a molten polymer occurs through
20	one o	f injection molding, multi-injection molding, co-injection molding, and gas
31	assist	molding.
1	4	The method of claim 2 surhagein at least two will

- 1 4. The method of claim 3, wherein at least two polymers are co-injected into the
- 2 mold.
- 1 5. The method of claim 1, further comprising:
- 2 ejecting a one-piece introducer.
- 1 6. The method of claim 1 further comprising:
- 2 inserting a valve into the tube.

056301.P551 15

- The method of claim 1, further comprising: 7. 1
- forming a plurality of finger tabs. 2
- The method of claim 1, wherein the polymer is selected from the group 8. 1
- consisting of liquid crystal polymer, polyetheramide, polycarbonate, polyester with 2
- glass fiber, polyester with carbon filler, polyamide with glass fiber, thermoplastic 3
- elastomer, polyolefins and polyamide with carbon filler. 4
- The method of claim 1, wherein the polymer is introduced into a mold at a 1 9. temperature approximately in the range of 200°C to 340°C.
 - The method of claim 8, wherein the polymer is introduced at a pressure 10. approximately in the range of 1,000 psi to 5,000 psi.
 - The method of claim 1, wherein the first portion of the cavity forms a second 11. finger tab.
- The method of claim 5, wherein one of a longitudinal scoreline and offline 4 12.
- scoreline is formed in the tube of the introducer. 2
- The method of claim 5, wherein a beveled tip is formed at a distal end of a 1 13.
- tube of the introducer. 2

:: |**1**:

111 121

- A method of making a one-piece introducer comprising: 1 14.
- providing a mold having a cavity, wherein a proximal portion having a 2
- finger tab portion and a distal portion having a tube portion, wherein the finger tab 3

16

portion is connected to the tube portion through a hinge portion; 4

056301.P551

- 5 introducing molten polymer into a cavity of a mold; and
- 6 forming a scoreline along the tube portion.
- 1 15. The method of claim 14, wherein the polymer is selected from the group
- 2 consisting of liquid crystal polymer, polyetheramide, polycarbonate, polyester with
- 3 glass fiber, polyester with carbon filler, polyamide with glass fiber, polyolefins,
- 4 thermoplastic elastomers and polyamide with carbon filler.
- 1 16. A one-piece introducer for an intravascular device, comprising:
- 2 at least one finger tab portion;
 - a tube portion;

1 2

3

- a hinge portion between the finger tab portion and the tube portion, wherein the finger tab portion, the hinge portion, and the tube portion form a seamless introducer.
- 17. The one-piece introducer of claim 16, comprising a polymer selected from the group consisting of liquid crystal polymer, polyetheramide, polycarbonate, polyester with glass fiber, polyester with carbon filler, polyamide with glass fiber,
- 4 thermoplastic elastomers, polyolefins and polyamide with carbon filler.
- 1 18. The one-piece introducer of claim 16, wherein the tube portion is
- 2 substantially hollow.
- 1 19. The one-piece introducer of claim 16, wherein the finger tab portion has a
- 2 shape which is one of substantially rectangular, cylindrical, spherical, and square.
- 1 20. The one-piece introducer of claim 16, further comprising:

056301.P551 17

- 2 a scoreline formed on the tube portion.
- 1 21. A one-piece introducer comprising:
- 2 at least one finger tab portion;
- a tube portion having a scoreline, wherein the at least one finger tab portion 3
- and the tube portion are seamless. 4
- The one-piece introducer of claim 1, wherein a hinge is located between the 22. 1
- 2 tube portion and the at least one finger tab portion.
- 23. The one-piece introducer of claim 21, wherein the tube portion is substantially hollow.
 - 24. The one-piece introducer of claim 21, wherein the finger tab portion has a shape which is one of substantially rectangular, cylindrical, spherical, and square.
 - 25. A one-piece introducer comprising:
 - a tube;
 - the first finger tab and the second finger tab formed at a proximal end of the
- tube without seams; and 4
- 5 a scoreline formed on the tube.
- The one-piece introducer of claim 25, further comprising: 1 26.
- 2 a safety valve is coupled at the proximal end of the tube.
- The one-piece introducer of claim 25, comprises a polymer, the polymer is 1 27.

18

selected from the group consisting of liquid crystal polymer, polyetheramide, 2

056301.P551

- 3 polycarbonate, polyester with glass fiber, polyester with carbon filler, polyamide with
- 4 glass fiber, thermoplastic elastomers, polyolefins and polyamide with carbon filler.
- 1 28. The one-piece introducer of claim 25, wherein the scoreline extends to a
- 2 beveled distal tip of the tube portion.
- 1 29. The one-piece introducer of claim 25, wherein the tube is substantially
- 2 hollow.
- 1 30. The one-piece introducer of claim 25, wherein the finger tab portion has a shape which is one of substantially rectangular, cylindrical, spherical, and square.
